CIPC HIGHLIGHTS
30 January - 14 February 1985

Soviet Strategic Relocatable Targets: LTG Williams and Deputy Under Secretary of Defense, T. K. Jones, requested that the CIPC assist the Defense Science Board (DSB) in their study on Soviet Strategic Relocatable Targets. Given the knowledge and expertise the CIPC's Mobile Missile Panel has developed, their efforts could contribute significantly to the DSB study. A memorandum was forwarded to the DCI on 1 February requesting concurrence in amending the TOR for the panel to include this DSB effort.

25X1 []

Addendum to Narcotics Study: Has been reviewed and approved by CIPC. It was forwarded to you and the DCI on 7 February. This report was done at your direction and provides information on the progress made thus far on interagency coordination and narcotics intelligence collection and analysis. []

25X1

Chemical/Biological Warfare (CBW) Study: The CBW Study as approved by the DCI, has been forwarded to the CIPC members for their information and implementation as appropriate. In view of the DCI's decisions, the CIPC CBW Intelligence Subcommittee is wrapping up its activities and will produce a report to the CIPC prior to disestablishment by 1 April. []

25X1

US Intelligence Posture Toward China: The China Study was approved by the DCI for implementation in a memorandum to the NFIC dated 12 February 1985. []
